

20MCA243 MOBILE APPLICATION DEVELOPMENT LAB

Lab Report Submitted By

TANIA MARGRET SEBASTIAN

Reg. No.: AJC20MCA-2078

In Partial fulfillment for the Award of the Degree Of

**MASTER OF COMPUTER APPLICATIONS (2 Year)
(MCA)**

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

**AMAL JYOTHI COLLEGE OF ENGINEERING
KANJIRAPPALLY**

[Affiliated to APJ Abdul Kalam Technological University, Kerala. Approved by AICTE, Accredited by NAAC with 'A' grade. Koovapally, Kanjirappally, Kottayam, Kerala – 686518]

2020-2022

**DEPARTMENT OF COMPUTER APPLICATIONS
AMAL JYOTHI COLLEGE OF ENGINEERING
KANJIRAPPALLY**

CERTIFICATE

This is to certify that the lab report, “**20MCA243 MOBILE APPLICATION DEVELOPMENT LAB**” is the bonafide work of **TANIA MARGRET SEBASTIAN(Reg.No:AJC20MCA-2078)** in partial fulfillment of the requirements for the award of the Degree of Master of Computer Applications under APJ Abdul Kalam Technological University during the year 2021-22.

Ms. Sona Maria Sebastian
Staff In-Charge

CONTENT

S.No	Content	Date	Page No:
1	Design a Login Form with username and password using LinearLayout and toast valid credentials.		5
2	Write a program that demonstrates Activity Lifecycle.		9
3	Implementing basic arithmetic operations of a simple calculator		12
4	Implement validations on various UI controls		21
5	Design a registration activity and store registration details in local memory of phone using Intents and SharedPreferences		27
6	Design a simple Calculator using GridLayout and Cascaded LinearLayout		33
7	Create a Facebook page using RelativeLayout; set properties using .xml file		40
8	Develop an application that toggles image using FrameLayout		45
9	Implement Adapters and perform exception handling		48
10	Implement Intent to navigate between multiple activities		51
11	Develop application that works with explicit intents		54
12	Implement Options Menu to navigate to activities		59
13	Develop an application that uses ArrayAdapter with ListView.		63

14	Develop an application that use GridView with images and display Alert box on selection		66
15	Develop an application that implements Spinner component and perform event handling		70
16	Apply themes via code and manifest file		73
17	Develop application using Fragments		77
18	Implement Navigation drawer		82
19	Program to implement various SQLite operations : (INSERT, UPDATE ,DELETE ,SELECT)		86

Program 1

Aim: Program to design a Login Form with username and password using LinearLayout and toast valid credentials.

XML Code:

```
<?xml version="1.0" encoding="utf-8"?>

<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent" android:layout_height="match_parent"
    xmlns:card_view="http://schemas.android.com/apk/res-auto"
    tools:context=".MainActivity"
    android:orientation="vertical"
    android:background="#000">

    <androidx.cardview.widget.CardView
        android:layout_margin="64dp"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        card_view:cardCornerRadius="8dp"
        card_view:cardElevation="8dp"
        android:background="#fff">

        <LinearLayout android:layout_width="match_parent"

            android:layout_height="wrap_content"
            android:orientation="vertical"
            android:padding="24dp">

            <TextView android:layout_width="match_parent"
                android:layout_height="wrap_content"
                android:text="Login" android:textSize="36sp"
                android:textAlignment="center"
                android:layout_gravity="center_horizontal" />

            <TextView android:layout_width="wrap_content"
                android:layout_height="wrap_content"
                android:textSize="22sp" android:text="username"
                android:textColor="@color/black"/>

            <EditText android:layout_width="match_parent"
                android:layout_height="wrap_content"
                android:inputType="text"
                android:id="@+id/activity_main_usernameEditText" />
```

```

        <TextView android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:textSize="22sp" android:text="password"
            android:textColor="@color/black"/>

        <EditText android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:inputType="textPassword"
            android:id="@+id/activity_main_passwordEditText" />

        <Button

            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:id="@+id/activity_main_loginButton"
            android:text="login" android:textSize="22sp"/>
    </LinearLayout>

</androidx.cardview.widget.CardView>

</LinearLayout>

```

Java Code:

```

package com.example.myapplication;

import androidx.appcompat.app.AppCompatActivity;import
android.os.Bundle;

import android.view.View; import
android.widget.Button; import
android.widget.EditText;import
android.widget.Toast;

public class MainActivity extends AppCompatActivity {private
    EditText usernameEditText;

    private EditText passwordEditText;

    private Button loginButton;

```

```

@Override

protected void onCreate(Bundle savedInstanceState) {

    super.onCreate(savedInstanceState);

    setContentView(R.layout.activity_main);

    usernameEditText = findViewById(R.id.activity_main_usernameEditText);
    passwordEditText = findViewById(R.id.activity_main_passwordEditText);
    loginButton = findViewById(R.id.activity_main_loginButton);

    loginButton.setOnClickListener(new View.OnClickListener() {

        @Override

        public void onClick(View v) {

            if (usernameEditText.getText().length() > 0 &&
passwordEditText.getText().length() > 0) {

                String toastMessage = "Username: " +
usernameEditText.getText().toString() + ", Password: " +
passwordEditText.getText().toString();

                Toast.makeText(getApplicationContext(), toastMessage,
Toast.LENGTH_SHORT).show();

            } else {

                String toastMessage = "Username or Password are not populated";

                Toast.makeText(getApplicationContext(), toastMessage,
Toast.LENGTH_SHORT).show();

            }

        }

    });

}
}

```

Output:

Program: 2

Aim : Write a program that demonstrates Activity Lifecycle.

XML File

```

Aim: Develop an application that toggles image using FrameLayout

Activity_main.xml

```
<FrameLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:orientation="vertical"
    android:layout_width="match_parent"
    android:layout_height="match_parent">
    <ImageView
        android:id="@+id/iv1"
        android:src="@drawable/img_1"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:scaleType="fitXY" />
    <ImageView
        android:id="@+id/iv2"
        android:src="@drawable/img"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:scaleType="fitXY" />

</FrameLayout>
```

MainActivity.java

```
package com.example.toggle1;

import androidx.appcompat.app.AppCompatActivity;

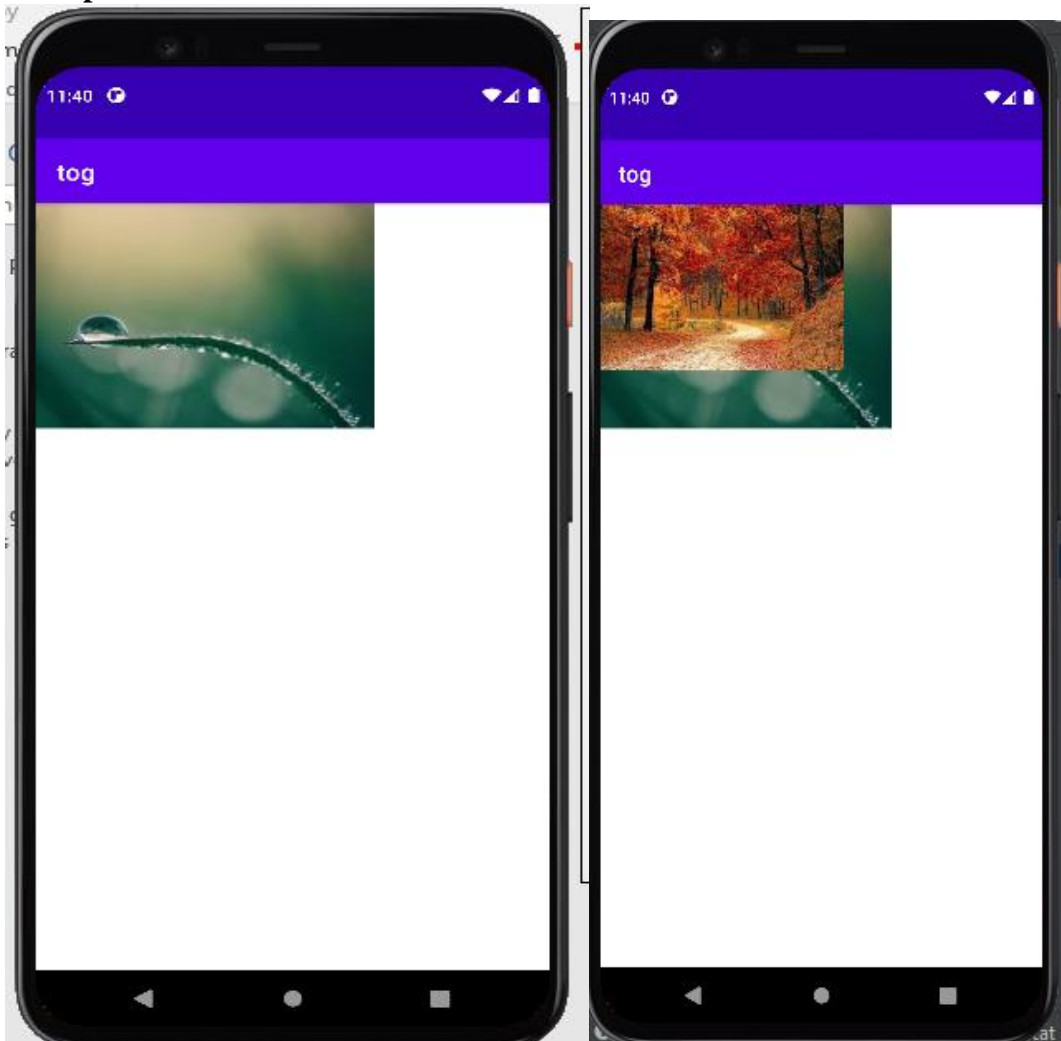

import android.os.Bundle;
import android.view.View;
import android.widget.ImageView;

public class MainActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        ImageView iv1=findViewById(R.id.iv1);
        ImageView iv2=findViewById(R.id.iv2);

        iv1.setOnClickListener(new View.OnClickListener() {
```

```
        @Override
        public void onClick(View v) {
            iv2.bringToFront();
        }
    });
    iv2.setOnClickListener(new View.OnClickListener() {
        @Override
        public void onClick(View v) {
            iv1.bringToFront();
        }
    });
}
```

Output
